

Have Sexy Curves In Full Figure Lingerie

Whether you are in the market for a sexy bra and panties set or more exotic items such as bustiers or corsets, read on to discover what you should know about today's full figure lingerie.

Enhance Your Assets

Every woman, no matter what her size, has certain parts of her body that she loves and parts that she hates. The fuller figured woman is no exception. When looking for lingerie, begin by making an honest assessment of your body. Look for lingerie options that enhance your assets while downplaying the areas that you are not as comfortable with. For example, if you love your bust but are less happy with your rear end, why not pair a sexy push-up bra with a pair of matching full-coverage boy shorts? Likewise, remember that a short robe or bed jacket can provide coverage in just the right areas. Look for combinations that work well on your own unique body.

Use Your Advantages

Fuller figured women are able to wear many styles that simply would not work on a smaller woman. Examples include bold patterns and fancy detailing, which overwhelm a smaller frame but look wonderful on a larger framed woman. Look for pieces that are beautifully decorated. Also remember that corsets and other bust enhancing lingerie pieces are perfect on fuller figured women.

Buy the Right Size

“Buy for the size you are now, not the size you hope to become.” Too often, women of all sizes fail to heed this simple rule, ending up with closets full of too small clothing. Why not enjoy life today, at the exact size that you currently wear? If your size changes tomorrow, buy new clothes tomorrow! For today, make sure that anything you buy fits well and makes you feel beautiful right now.

Make sure you know what size you actually wear. Have measurements taken or take your own. In order to make you look and feel beautiful, your lingerie must fit well. Do not assume that you are the same size you were a year ago.

Work with the Salesperson

If you are not experienced in buying sexy plus size lingerie, work with an experienced salesperson in a dedicated full figure lingerie shop. She will be able to make suggestions that you might never have thought of. She can also help you determine your trouble spots as well as your assets and help you figure out the best combination of camouflage and enhancement.

Throughout much of history, fuller figured women had very few options in lingerie. Times have changed and there is now a plethora of sexy plus size lingerie from which to choose. Spend some time up front trying things on and deciding what styles you like, and you will find that buying beautiful full figure lingerie becomes both fun and easy.
